PROFILE

Creative and driven Front End Developer with experience using React.js to create fast and interactive websites and applications with intuitive and eye-catching designs. I focus on providing the best value to the customer and am passionate about constantly learning new things and being a valuable member of any team I join.

SKILLS

Programming Skills: HTML, CSS, JavaScript

Frameworks: React, Next.js, TailwindCSS

Tools & Platforms: Git, Parcel, Webpack, CRA, Vite, Firebase, Sanity CMS, Netlify, Vercel, Figma

Languages: Russian, English, Japanese

PROFESSIONAL EXPERIENCE

Freelance | *Portfolio website for a writer*

01/2023 - 02/2023

- Created a website using **React.js** for a writer to showcase their work and awards, which they have been able to share with their family and colleagues
- Handled client-side routing and pre-rendering using **Next.js**
- Developed a modern and responsive UI using **TailwindCSS** with accessibility in mind
- Integrated **Sanity CMS** to easily customize the content to meet the client's needs
- Incorporated best SEO practices and achieved a perfect score in the Core Web Vitals metrics

PERSONAL PROJECTS

Personal Website

- Built the UI using React.js and TailwindCSS, statically generated with Next.js
- Structured content and queried data using Sanity CMS
- Optimized the website to improve SEO performance

Browser Messenger Application

- Built the UI using React.js and TailwindCSS, used Vite as the build tool
- Integrated Firebase to allow user authentication and ensure real-time updates on the client-side
- Implemented features such as user profile customization, multiple sign-in options, dark mode settings, user search, chat filtering, image uploads, message editing, and responsive design
